PROJECTS

1. GOGO(Academic project)

- Bus Tracking and Ticket Booking through QR Code, In Python and MYSQL using Django FrameworK
- Description - The GOGO tracks buses live and tell you what time your bus will reach your exact destination. In this fast life, everyone is in hurry to reach their destinations. In this case, waiting for the buses is not reliable. For people who rely on public transport, their major concern is to know the real-time location of the bus for which they are waiting and the time it will take to reach their bus stop. This information helps people in making better traveling decisions. This helps make the travel experience seamless. 1

2. Q CLASSROOM

- Learning Management system using all CRUD operations, In Python and SQLITE using Django FrameworK
- Description - Q CLASSROOM is a learning management system, in which students can view their course syllabus and teachers according to their subjects. The online students of QUEST innovative solutions are provided with video sessions for study purposes through Gmail drive sharing, the QCLASSROOM is introduced to overcome the complexity of sharing and displaying videos. we provide a platform for students, teachers, and staff to make their work ease
